# Workshop 2 peer review

Instructions how to start program in Windows 10:

1. Use command prompt

2. Check if you have latest java version. That's mine output for command java -version:

```
C:\>java -version
java version "15" 2020-09-15
Java(TM) SE Runtime Environment (build 15+36-1562)
Java HotSpot(TM) 64-Bit Server VM (build 15+36-1562, mixed mode, sharing)
```

3. Extract ws2.zip into hard disk
4. Use this command to start the program:

```
C:\>java -jar c:\ws2\ws2.jar
```

Don't forget to specify path to the place where you have extracted ws2.zip
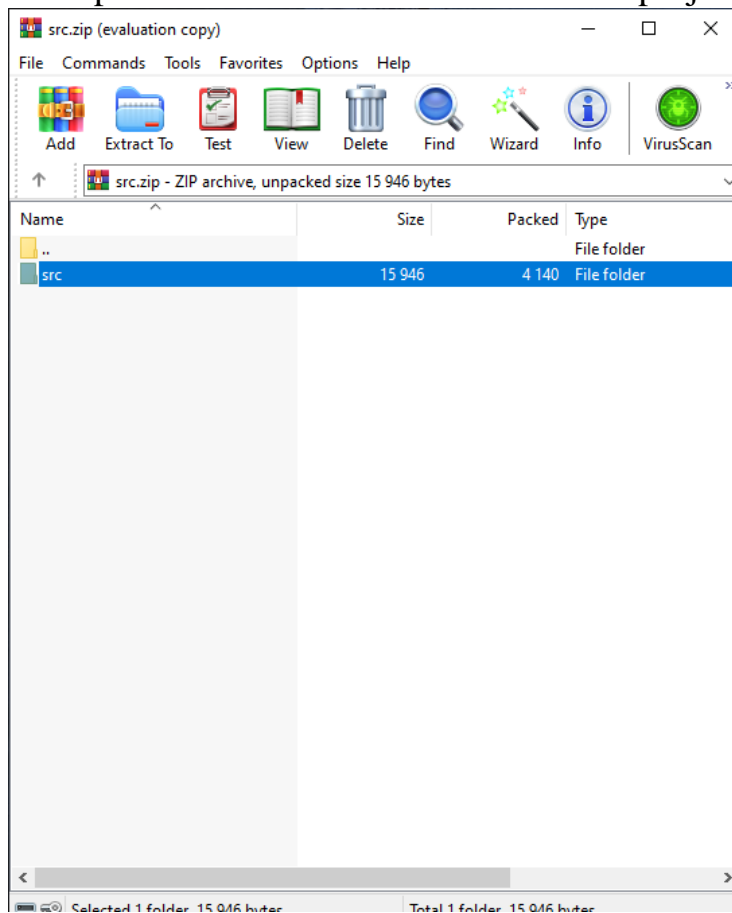

5. Something like that should happened:

```
***WORKSHOP 2 BOAT CLUB***
Welcome to main menu
1. Member
2. Boat
3. List
```

6. Enjoy!

For those who want to check project structure:

Src.zip contains src folder with the whole project

1. For those who had java course: you know how to use that in Intellij or Eclipse

2. For others – Inside packages (model and view) *.java files can be found.

3. Use notepad to open *.java files

4. Hope that was helpful
